Experience 2013 - Present

With over 25 years of experience as a photographer and cinematographer, I film commercials for TV, and social media advertising campaigns. My work also involves photographing anything from architecture, construction projects, real estate, food and environmental portraits. I also enjoy working on short and long term documentary projects from concept to the finished film. Editing hours of footage to create short, smart, impactful videos is a passion of mine and finding new ways to shoot using new technology with every project feeds my creative nature. Early in my career I focused on breaking news and sports for wire services for both national and local Boston newspapers.

Freelance Photographer - Cinematographer 1993 - 2013

I enjoyed being on call 24/7 to local assignments covering New England for the New York Post, Bauer Publishing and Splash News and The Associated Press. Shooting assignments while on deadline including, general assignment, breaking news, features and sports. I also travel with the Massachusetts Urban Search and Rescue Team (FEMA) as a filmmaker to capture their work during natural and man-made disasters. I first traveled with the team to New York City on September 11th and continue to travel with the team as an embedded filmmaker.

Continuing Education and Memberships 2000 - Present

FAA certified part 107 sUAS pilot since 01/25/2017 (Current)
